

BIO™ for Microsoft Dynamics™ SL

BIO Advanced

Benefits

- **Project, Distribution and Field Service Analysis**

BIO advanced extends the financial series support and provides analysis of the data found in the project, distribution and field service modules. The benefit – you and your employees are better equipped to manage projects from start to finish.

- **Empower More People**

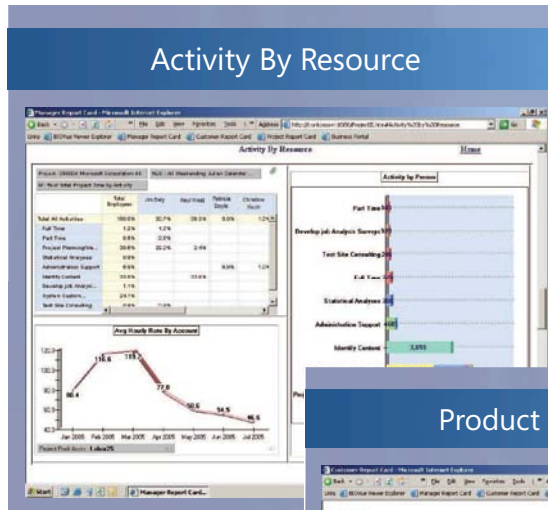

BIO advanced expands upon where BIO foundation started. This provides a look at the bigger picture, with a goal of making more information relevant to more employees. With the data from the operational modules project managers, service managers, operations managers, and others can get involved in a more meaningful way to help build a better company. Each person can now put more data recorded in Microsoft Dynamics SL, giving them the benefit of gaining a deeper understanding of their business.

- **60 Predefined Views of the Data**

Providing you with the full scope of the solution available to your people, we've included 60 views of the data in BIO advanced. These views are beneficial, as they help people be productive right away, and are configured for tailoring to an individual's specific needs.

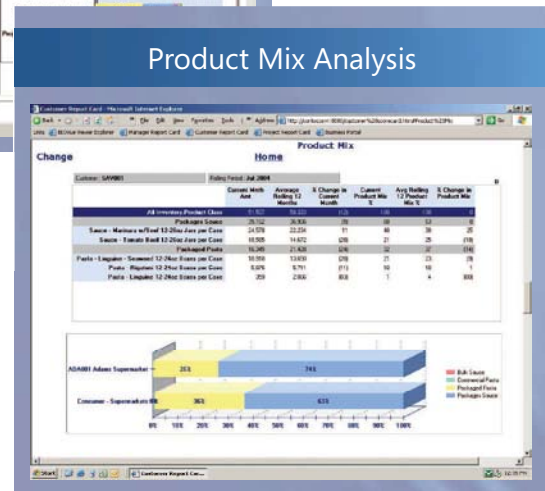

BIO advanced provides the operational analysis you need.

BIO advanced builds on top of BIO foundation by providing far-reaching operational analysis of your business. Gain a much deeper insight into project operations and inventory sales. Extend this information throughout your company – from front line managers to executives – to empower your employees to help build a better company.

Review project activity by type and person, as well as realization rates over time.

Quickly assess product mix performance by item class over a rolling 12 month period.

BIO for Microsoft Dynamics SL advanced has up to 430 business activities that can be tracked from your day to day operations. These activities are then presented in any of 60 predefined views. To make analyzing the data straightforward, these views have been organized into 14 typical roles such as CFO, CEO, Accounting Manager, Project Manager, Resource Manager, Sales Manager, Operations Manager, and more.

BENEFITS

FEATURES

More perspectives of operations and finance	BIO for Microsoft Dynamics SL advanced provides a total of 60 predefined views of Microsoft Dynamics SL information, building upon the views available in BIO foundation. These views cover up to 430 business operations across project management and accounting, distribution, field service, and finance.
Distribution analysis	BIO advanced provides access to the distribution modules, including inventory, order management and purchasing.
Project management and accounting analysis	BIO advanced provides access to the project management and accounting modules including project controller, time and expense for projects, allocator, and project contracts.
Field service analysis	BIO advanced provides access to portions of the field service modules including service call activity.
Dimension substitution	If you use Flex-Key definitions in the subaccount, project, or task fields of Microsoft Dynamics SL, you can substitute different filtering choices by segment to present the data the way you want.
Drill down capability	Drill down to the transaction level detail from the initial perspectives.
Data security	Your data is secure. Microsoft SQL Server Analysis Services can provide security down to the individual cell level if desired.
One click installation	Installation of BIO for Microsoft Dynamics SL can be accomplished with a one-click installation for simple environments.
